

Work Centers & Transport Products

WorkCenters & Transport

Buckhorn offers a full line of wood, steel and plastic transport products to complement our complete selection of material handling containers and pallets. In addition, we offer wood and steel workbenches, work tables and custom-engineered products for unique applications.

- Constructed of industrial-grade steel, quality hardwoods or structural foam plastic for durability
- Exceptional strength to withstand heavy loads and rough handling
- Large selection of caster options for any working environment
- Metal products feature powder-coat finish for long-lasting durability
- 100% recyclable construction

Did You Know...?

Buckhorn and Akro-Mils are both Myers Industries companies. Together, we can outfit your entire material handling system from totes to bins to carts.

Workbenches & Work Tables

Back Stop

Wrap-around back stop keeps items from falling behind workbench

Platform Trucks

Versatile Options

Choose the deck size, caster type and handle style to create a configuration to fit the application

Wood, Steel or Plastic

Select from kiln-dried, tongue and groove hardwood, heavy-gauge steel or structural foam plastic surface types

Heavy-Duty, Welded Steel

Steel decks, frames and shelves are all welded, not riveted, for extra durability

Call (800) 543-4454 about custom-engineered products or modifications to an existing style of cart, truck, dolly or work center to meet specific applications.

Bulk Box Tugger Cart

- Works with tugger to easily move bulk boxes and pallets
- Durable, welded construction on sturdy casters (options available)

Priority Storage System

- Custom-sized for Akro-Mils' 30312 System Bins & 30240 AkroBins®
- Heavy-duty bins rest directly on rails – no shelf!
- Assembles quickly, no tools necessary
- 350 lbs. capacity
- 9 available kits:
 - 4 color options for System Bins
 - 5 color options for AkroBins

Benefits of Powder Coating

Through an electrostatic process, finely ground particles of pigment and resin are sprayed onto a part surface. The charged powder particles adhere to the surface until heated and fused into a smooth coating in a curing oven. The result is a smooth, durable, high-quality and attractive finish.

- Powder Coating is more durable and longer lasting than a diluted liquid spray
- Powder Coating is more resistant to:
 - Chipping
 - Chemicals
 - Weathering/Salt/UV
 - Scratches
- Once processed, powder coating will not melt and can be repainted
- Environmentally friendly — contains no pollutants and overspray can be recycled

Angle Posts

For added strength and rigidity

Shelf Carts & Portable Tables

Powder-Coated Steel

Powder coat painting process provides a durable finish that resists chipping and rust

Smooth Operation

Zinc-plated rigs and hardware are resistant to corrosion; non-marking polyolefin wheels have exceptional impact resistance

Six Deck Types

Quality hardwood dollies are available as solid, flush, regular, carpet end, rubber cap or fully carpeted for many loading applications

Dollies

Heavy-duty Casters

Support load capacities up to 5,400 lbs.

Custom Accessories

Choose from several caster options, rubber matting, lips up or down

Custom engineered products can be designed for your application/specification.

Wire Shelving Packages

- Wide variety of Wire Shelving heights and styles: 63" upright with casters and 74" upright stand alone to fit all locations
- Bin and shelf configurations available for more than 30 system options!
- Five customizable shelf sizes available: 14" x 36", 14" x 48", 18" x 36", 18" x 48", 24" x 48" and 24" x 60"

Super-Size AkroBins® & Carts

- Super-size AkroBins (sold separately) store and organize large bulky items
- Help control inventories, shorten assembly times and minimize parts handling
- Carts allow easy organization and transport of bulky parts in 6, 9 and 12 bin configurations
